

Portable Vacuum Solutions

Insulation Company EU Zone

TASK

IBS was requested to provide a hire a unit as a trial for housekeeping and machine maintenance purposes.

Options

1. Portability was vital. The operator had to be able to reach all parts of the factory and the unit had to have an easy-empty facility.
2. As most of the on-site maintenance was going to be carried out at night, the unit had to be easy to operate.

Solution

The 16.5kw Standvac complete with a big bag filling system was the ideal machine for the task. In addition to the vacuum unit we supplied three, 10 metre hoses which enabled the operator an extended reach.

System components

- 1 x 16.5kw 32 a Standvac
- 3x 10m hose
- 2 x 1m³ big bag
- 1 x 32 a cable 10m
- Extensive tool kit
